The screenshot shows a mobile browser interface. At the top, there is a status bar with a signal strength icon, the time 19:31, a battery icon at 25%, and a Wi-Fi icon. The browser title is "Find Flash Player version" with a dropdown arrow and a close button (X). Below the title bar, there is a link: "Support page for help with top issues." On the right side, there is a "Contactin" button. The main content area has a red heading: "Flash Player version that this browser is running". Below this, it says: "The following image is an animation that Flash Player displays. The image shows information about the Flash Player running in the browser that is displaying this page:". The information displayed is: "Your Player Version: LNX 10,1,92,8" and "Debug Player: No". Below this, there are four rows of system information: "Operating System: Linux 2.6.28-omap1", "Video Capable: Yes", "Audio Capable: Yes", and "Local File I/O Enabled: Yes". At the bottom of the content area, it says: "If you don't see any image, or you see an image that instructs you to download Flash Player, then you do not have Flash Player installed for this browser. To install Flash Player, go to the Adobe Flash Player Download Center". The bottom of the screenshot shows a browser navigation bar with a back arrow, a plus sign, the address bar containing "http://kb2.adobe.com/cps/155/tn_15", a dropdown arrow, a search icon, and a refresh icon.
