The screenshot shows the Hex Workshop interface with the following components:

- Hex Dump:** A table of hex values and their ASCII representations. The hex value '00' at offset 00354695 is highlighted in yellow.
- Data Inspector:** A panel on the right showing data at offset 0x0035469D, including fields like int8, uint8, int16, etc.
- Structures:** A table listing BIOS structures with their values and sizes.
- Search Results:** A panel at the bottom right showing 25 instances of 'AA557F' found in the file.

Member	Value (dec)	Value (hex)	Size
00354604 uint8 Unknown37	1	01	00000001

8 MB after the crisis recovery drive I have a warning from Dell about a necessary upgrade to the BIOS file and clicked on it it went this InsydeFlash protocol and now my browser is updated every 20 seconds or so, input to unterbrechen.. As the link below says, BIOS update may be dangerous and should be avoided unless you have a very good reason to do it (for example, fix a problem).. Reply Tuan says: 06072014 at 02:05 this does not work for HP Mini 0E no help, please Reply Delio says: July 13, 2014 23:08 Hi, I have Compaq Presario CQ61-322sl how to fix the update bios problem We can import payment information you entered during a previous purchase, giving you the opportunity to use payment information while purchasing a new product.. The only combination that causes some kind of response is Ctrl-Home The computer will access the flash drive for a few seconds, but give up and do nothing.. BTW Only files on the two usbs are K55A bin K55A 407 I did it with the latest also available BIOS tries the oldest BIOS from the ASUS web site I used two usbs an 8GB scan disk and the other 8GB Kingston USB capacity on both went to 31.
